Hi Kathleen,

I tried to work backwards to find the company names using Google Maps but still couldn't tell for sure the companies associated with the coordinates, especially since in some instances those locations are former locations of companies associated with PFAS.

Here's how I did the search:

- Open [Google Maps](#) url
- Copy and paste the coordinates (e.g., 39.770261, -75.356080) into Google Maps search field
- Zoom in and out on location in Google Maps to find the company name. In this example, it's not clear what company is at this site.

Contacting the author might be an easier and more accurate way of obtaining this information. Please let me know what you find out.

Thanks,

Toni Krasnic

Thanks. What are the names of companies 1-16? I know #9 in Minnesota is 3M.  
Kathleen

Hi Kathleen,

The citation of the 16 industrial sites listed in the appendix (and shown below) is incorrectly cited to the 2010/2015 PFOA Stewardship Program.

The new web link I sent you is the replacement of the old link in Reference 31.

Please contact the author for the correct citation for these 16 industrial sites.

Thanks,

Toni Krasnic

**Subject:** Re: PFOA

Hi Toni,

Thanks for the response. I was referring to citation in [Hu et al. 2016](#) p. 345. "PFAS Point Sources. Our spatial analysis (Figure S1) included point source information for (a) 16 industrial sites listed in the US EPA's 2010/2015 PFOA Stewardship Program (Table S2),<sup>31</sup>

(31) Per- and Polyfluoroalkyl Substances (PFASs) under TSCA; Environmental Protection Agency: Washington, DC (<https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/and-polyfluoroalkyl-substances-pfass-under-tsca>).

The link no longer works. Do you have this table?

Thanks.

Dear Ms. Schuler,

Thank you for your inquiry.

I'm not aware of a list of "16 industrial sites where PFAS contamination was detected that are targets of the Stewardship program." EPA launched the 2010/2015 PFOA Stewardship Program in January 2006 because of concerns about the impact of PFOA and long-chain PFAS on human health and the environment, and didn't target any specific sites contaminated with PFAS. Rather, all eight participating companies committed to work toward a global phaseout of PFOA and related chemicals across their U.S. and global operations. All public documents from the 2010/2015 PFOA Stewardship Program submitted by the companies are available in [EPA Docket EPA-HQ-OPPT-2006-0621](#).

Additional information about the 2010/2015 PFOA Stewardship Program is available at <https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/risk-management-and-polyfluoroalkyl-substances-pfass>. Additional information about EPA's activities on PFAS is available at <https://www.epa.gov/pfas>.

Please let me know if you have any additional questions.

Sincerely,

Toni Krasnic

Comments: Can you please send me list of the 16 industrial sites where PFAS contamination was detected that are targets of the Stewardship program, including the location of each site and the name of the company associated with PFAS production there. Thank you!
